Education

Research units are linked to what is known as second-cycle education, i.e. Masters and Doctorates.

Masters associated with LIDILE are presented on the Associated Masters page.

You will also find the list of theses in progress, for the doctorate, and this page also indicates the accreditations to supervise research of team members also in progress. The Doctoral Student Information page is aimed at doctoral students or future doctoral students of the unit. The list of already defended theses and HDRs is also available.

Finally, team members develop their educational activities in a cross-disciplinary manner across the first and second cycles. This is why we have added a page on pedagogical projects in progress or completed.
